Product Vision

For students & teachers who want to find convenient opportunities to knock tasks off of their todo list without having to rigorously schedule every little thing, **CHAIN REACTION** is a task management website that allows for tasks to be conveniently dropped into a todo list based on completed tasks & deadlines. Unlike apps like Todoist or Things, **CHAIN REACTION** is smarter about what tasks are presented & when, helping to avoid scheduling fatigue & burnout.

User Stories

Corbyn Rasque

As a teacher who spends a lot of time planning lessons & grading assignments, I'd like a task manager that's simple and which drops the things I need to do into my routine so I can use my downtime more effectively.

As a teacher who spends a lot of time creating a schedule for my students, I'd like to be able to simply give them a flexible template of the class schedule, which allows them to see homework & easily fit it into their schedule.

As a student with a lot of small assignments that can easily fall through the cracks, I'd like to have a minimal todo list app that emphasizes quick entry and allows for items to be logically connected in a more flexible way than a basic & rigid todo list or calendar.

Khushkaranpreet Singh Grewal

As a student who is taking a high number of class units, I want my time and tasks managed automatically so that I can spend time on finishing assignments instead.

As a person who struggles with keeping a prioritized list of things to do, I want this product to prioritize my task by time for me, so that I don't have to sit and figure out the ranking for tasks.

As a Smartphone Junkie, I want things to be simple and less distractive, so that I can look at my task without being distracted before I can finish setting up my tasks.

Elijah Villanueva

As an avid procrastinator, I want a strict time limit on my tasks so that I can break the habit of waiting until the last second to work on tasks.

As a student who works on multiple machines, I want an account that uses a username and password so that I can access my to-do list on multiple devices using these credentials.

As a student who values breaks, I want a functional pomodoro timer so that I can segment my studying time and break time accordingly

Anthony Thang

As an individual looking for work, I want to track my job applications, including dates and interview schedules to manage my job search effectively and keep track of time.

As a gym-goer who tracks their progress using their notes app, I want to log workout achievements and see my gradual progression to stay motivated by hitting milestones and comparing my fitness goals.

As a student applying for college, I want to keep track of weighted deadlines and receive reminders for any essays or documents needed to submit everything without getting too close to the deadline.
